## 2022 20" Step-Through Fattie - Security in Motion

This nimble and maneuverable little electric bike is super easy to get on and off as a result of its step-through frame design and just as easy to ride and control for novice or experienced riders. The front basket and rear carrier also make it a very practical vehicle for moving small loads.

The Ebike is fitted with a high efficiency 750W brush-less geared rear hub electric motor with a reduction ratio of 1:5 and 85Nm of ample torque. It comes standard with a 21Ah 48V Samsung Cell Li Battery which doesn't build up memory which enhances capacity and range by up to 100%. The 25A heavy duty intelligent controller provides motor and controller temperature protection as well as intelligent parameter setting.

The step-through bike is perfectly suited for all security applications including but not limited to; large estates, mines and gated communities. Invest in staying mobile while saving costs. It's the smart thing to do!

### Specifications

- Aluminium Alloy Frame
- Front Suspension Fork
- Suspension Seatpost
- Mountain Style Alloy Pedals
- Foldable Saddle
- Aluminium Double Wall Alloy Fat Rims
- Aluminium Alloy Handle Bar
- Aluminium Alloy Rear Carrier
- Water Bottle cage
- Front and rear LED lights
- 48V Bafang 750W Rear Hub Motor
- LCD display
- Aluminium Front Basket (direct mount)
- 20" x 4.0" anti-puncture tyres/tubes
- 10 Speed SRAM GX drivetrain
- 11-36t Long Range 10Sp Cassette
- 104 BCD narrow wide chainring with alloy guard
- KMC Anti-Rust Chain
- All round dual caliper 180mm hydraulic disc brakes
- Front and rear alloy mud guards
- Heavy Duty 25A controller + Speed Sensor
- PAS Thumb Trottle
- 48V/21Ah Samsung cell Lithium Ion Battery
- 48V Quick charger 3A
