## PERMACONN™

OSPAT (Occupational Safety Performance Assessment Technology) from Permaconn helps keep workers and workplaces safe by detecting impairment due to fatigue, stress and other factors. OSPAT is a real-time, scientifically-validated fitness-for-work solution that mitigates risk and supports safety compliance.

This data-driven monitoring of employee wellbeing is ideal for construction, mining, transport, industrial and other industries.

Delivers simple, non-invasive employee testing through a user-friendly terminal.

Evaluates a range of factors including fatigue and stress, to ensure employees are fit for duty.

Goes beyond basic drug and alcohol screening to assess wellbeing too.

Contributes to employer's duty of care to their staff.

Helps reduce risk to employees, their co-workers and the business.
